

Download the TFTP/BootP Services Utility , and the link as below :

<ftp://ftp.enterasys.com/pub/tftp.bootp/bootfft2.zip>

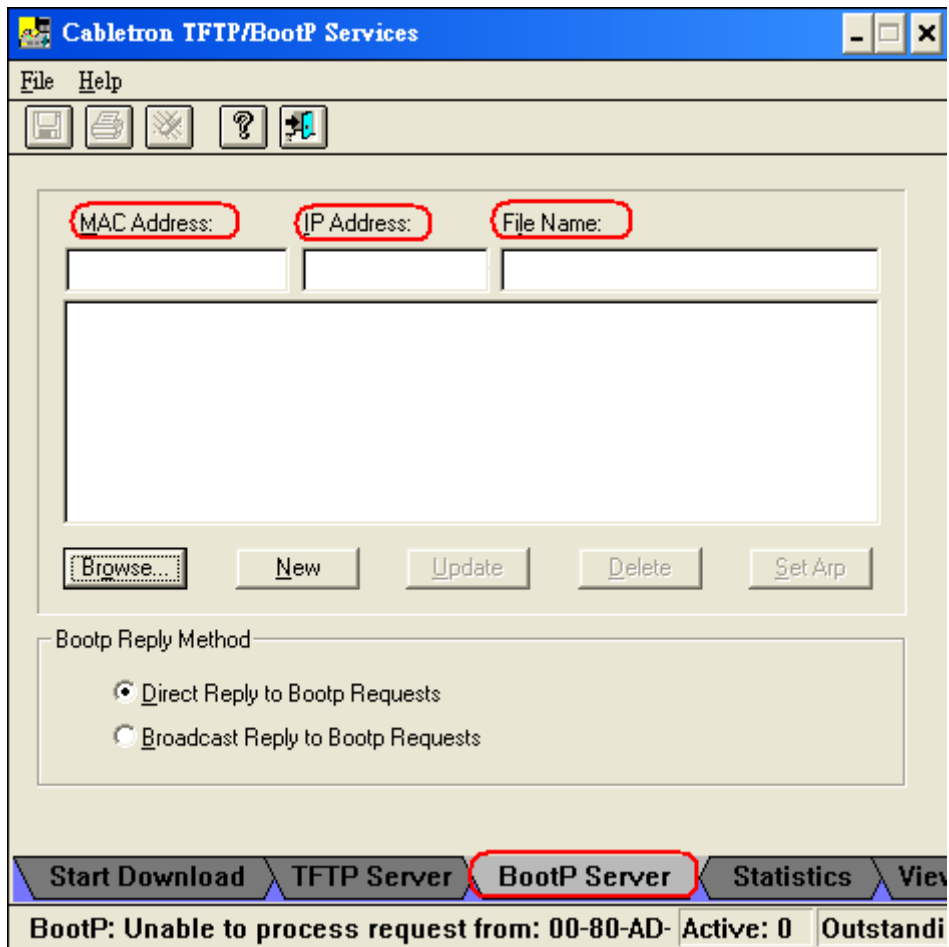

Please use the tool , it more easy to upgrade your SWAM Switch's firmware with this tool .

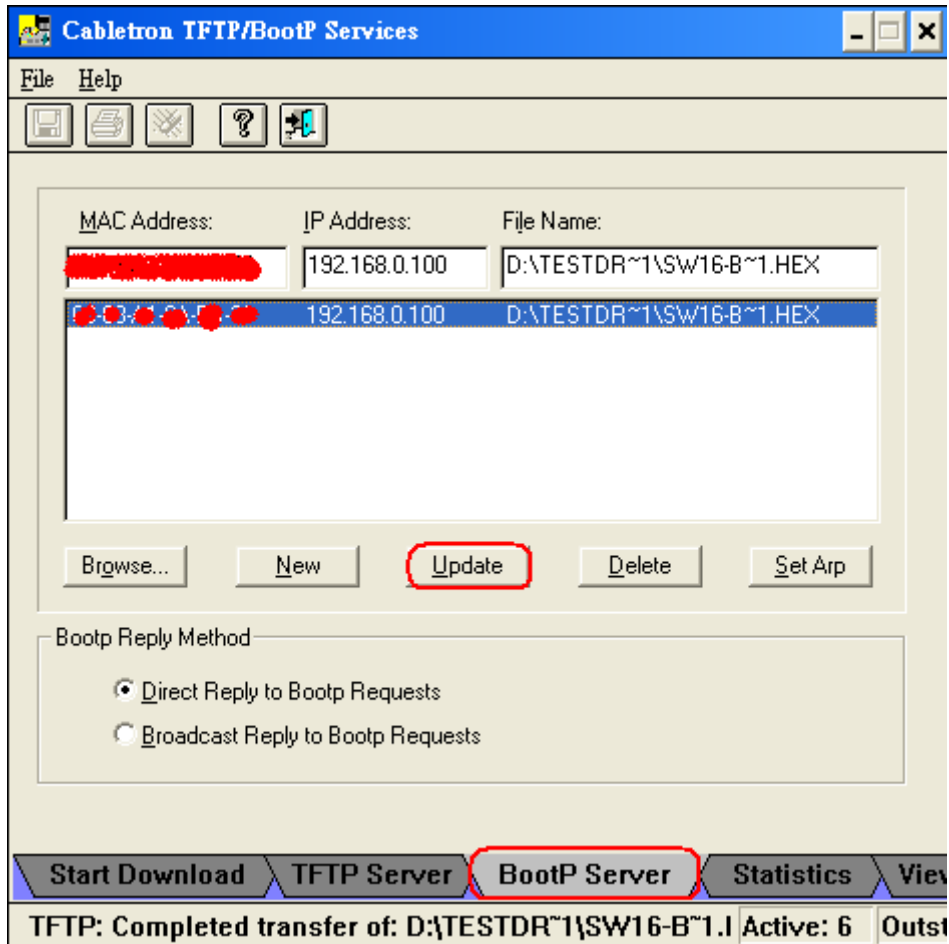

1. un-zip the download file , in the folder , run SETUP.exe . Then in the default install directory (like as C:\TFTPBOOT\BIN\), run the TFTPBOOT.EXE .

2. Click the BootP Server item , type in your SAWM Switch's MAC Address in MAC Address blank space , IP Address is the SAWM Switch's IP ,

Please input the full path of the Firmware file for "File Name" field. (i.e c:\sw24-Boot.hex) . Then click the UPDATE button .

3. Then you can enter your SAWM Switch with web-browser , click the Advanced Setting item , click the Update button . Then the upgrading process will start.
